

# Fukui-city Bousainokai Newsletter

2017.3.11 Opening ceremony & workshop at Fukui Happiring

## Fukui-city Kensyu center

Many workshops are held at the center Bunkyo 6-8-8.

We will concentrate on DIG (Disaster Ground Training) in this year. We will also work with Fukui-ken Bousaishikai and other disaster prevention society in other areas.

## 2018 June 24 (Sunday)

Fukui City general disaster prevention drills are carried out. Each primary school will be trained according to regional characteristics. Please actively engage with independent disaster prevention organization while working together.

Priority area was  
Haruyama 2016  
Yashiro-kita 2017  
Higashi-fujisima 2018

Also, special events will be scheduled on June 28th as this year will be 70 years since the Fukui Earthquake (M 7.1 in 1948).

## Voluntary workshop-centered activities

Established on March 11 (Sat) 6 years after the Great East Japan Earthquake, we held a memorial lecture by the general meeting, "Fukui Earthquake Factor is Lurking - The Response is" (lecturer: Takuo Okamoto Advisor).

In the Taisho era also talked about Professor Oomori Fuyoshi who made the foundation of seismology come from Fukui city. On Saturday, May 13, "Disaster volunteer and voluntary disaster prevention activity of the area" (lecturer: Masanori Hayashi), including the history after the Fukui earthquake, in terms of welfare (the happiness of everyday life) , Establishment of a disaster volunteer center, evacuation centers and so on. <The above picture is at that time, it was also used as an introduction article of our association in Nikkan Kenmin Fukuii dated March 11, 2018>

September 25, "Disaster Mitigation Information Disclosed by Meteorological Observatory" (lecturer: Mr. Shikoshi Shida of Fukui Regional Meteorological Observatory) was carried out. I learned the importance of early evacuation behaviors to protect my life "by myself" without being distracted by the bias of normality. The voluntary workshop planned for the next Monday, February 12 (Monday) was canceled by heavy snow, and was postponed to the general meeting on April 15th.

Although no big earthquake occurred in Fukui, Typhoon 21 on October 21 - 22, caused a major damage to Fukui-city, and power outages occurred throughout Fukui prefecture.

In the 30 heavy snowfall, fuel sale restrictions were also made, and the importance of "neighborhood association" and "daily stockpile" was reconfirmed.
