Disaster prevention handmade goods(slippers, mask, rain coat)

## Easy to do at home

A simple mask (for adults) can be easily made by holding a kitchen towel and a 4 rubber band with a stapler. I think it can be useful in cold prevention, infection prevention, dusty shelters, etc.

## Discussion while having fun with family and friends

We have booths at international exchange events=Global Festa 2019 (June 8: Happi Terrace), Fukui City Disaster Prevention Drill (June 23: Kunimi District), Fukui-city Bousai Fair (August 25: Happi Terrace), etc. We conducted handmade experiences of disaster prevention goods. It was also introduced in the evening wide TV program of FBC.

With scissors and staples made from newspapers,garbage bags, kitchen towels, etc.

We think it is good to discuss disaster prevention knowledge, daily stockpiling, evacuation methods, etc. while making fun.

Lecturers are dispatched to disaster prevention group, companies / organizations, schools and public halls, disaster prevention seminars, and DIG (Disaster Imagination Game) training.

Please feel free to contact us.
